# Davi Sales

FullStack Dev at SailThrough English  
Lisbon, Lisbon, Portugal

## Summary

As a Full Stack Developer, I've been instrumental in driving the success of online platforms, handling diverse tasks ranging from database management and payment system integration to automation solutions and UI development. Prior to this, I excelled as a Systems Administrator, where my expertise in server administration included setup, user account management, performance monitoring, and troubleshooting, alongside Docker container management and cross-functional collaboration. My educational background includes a Bachelor's degree in Computer Engineering.

---

## Experience

SailThrough English

Full Stack Developer

August 2022 - Present (1 year 8 months)

Fortaleza, Ceará, Brasil

As a fullstack developer at SailThrough, an online courses platform, my role is multifaceted and vital to the platform's success. I manage databases to ensure smooth data operations, integrating Stripe with both back-end and front-end systems for seamless payment processing. I also implement automation solutions to streamline various processes, while my Vue development skills contribute to creating an intuitive and visually appealing user interface. Additionally, I handle customer support, ensuring users receive timely assistance and resolution. My expertise with the LAMP stack, Active Directory, and documentation further strengthens the platform's infrastructure and ensures efficient operations. Furthermore, I work with CI/CD for fast deployment of our website, enabling rapid iteration and updates to enhance user experience and functionality.
